68 AGE-ADVANTAGED SIMANGUS™ BULLS
(58 BLACK AND 10 RED)

Special Feature

10 COMMERCIAL BRED HEIFERS
FROM THE HOUGHTON RANCH SELL

Hello, Beef Producers!

We welcome you to our annual bull sale. We feel fortunate to be in ranching this year with the wonderful moisture and great hay crops. The outstanding cattle prices have been amazing as well. With cattle numbers at an all-time low, selection of your future sires is extremely important to maximize success of your calf crop. Wicks Cattle bulls have brought customers top dollar on their calves and will continue to do so. This is part of our commitment to you. We are striving to improve our program to bring you sires that produce calves that top the sale, calves with wide top, heavy muscle, adequate rib depth along with a great hair coat and great disposition.

This is the first year our offering is entirely advanced age bulls. We have truly enjoyed the process of moving our calving to May and keeping the bulls long enough to mature them without pushing them on feed. It's a great feeling to bring you the cream of the crop by weeding through and removing anything with a disposition or conformation problem. We keep asking ourselves "why didn't we do this sooner?" We truly feel there is a difference in the hybrid SimAngus cattle and it's even more apparent seeing these bulls at an advanced age. It has been a rewarding process to bring them to the point they are at today. There are so many advantages to using advanced age bulls, their age ensures they will cover more cows and have greater longevity.

This offering is a quality set that is ready to go to work for you with a perfect balance of calving ease and performance. The SimAngus breed provides the hybrid vigor that heterosis provides and the performance side definitely shows at the scales, and your replacement heifers will have great maternal traits and adequate milk.

We have a very uniform set of bulls from a few different sire groups. The bulls are naturally thick and big topped with great depth. They have good legs and feet, and they travel well. They were weaned mid-November 2024 and were only in the feedlot for 10 days to get started on weaning ration. After that they were in a 40-acre pasture and started on a grower ration. In mid-April, they went to grass and rotated in 3 different pastures throughout the summer. On October 1st, 2026 they were moved to a 20-acre pasture until sale day. The bulls' feet and leg structure are genetically good and being out in the pastures rather than in lots they have been able to exercise to develop and mature slowly and soundly. Our focus was to bring you bulls with muscle and not fat, they are hard, and ready to go to work.

We are very proud to have been one of the ranches named "Dedicated Performance Advocate" by the American Simmental Association. We have reported traits on our calf crop for many years and began DNA tissue sampling for the last three years. In 2024 we became involved in the Cow Herd Roundup Program. We have tremendously improved our accuracy of our EPD's through parentage testing. The higher the accuracy (ACC), the lower the possible change (PC). This has brought us so much useful data to use in our decision making improving your herds profitability and performance. It also helps you make a more informed choice of your herd bull prospects. We do the 100k test, which checks markers to provide detailed genetic information as well. The Simmental breed is considered "The Science Breed" with heavy focus on performance data, genetic evaluation and genomic testing, this basis along with hybrid vigor/heterosis of SimAngus, there is typically faster growth, superior carcass quality and maternal excellence with good milk and earlier puberty than purebreds.

The bulls are eligible for registration, if you wish to register your animal and/or have transferred to you in the American Simmental Association, please let us know. This is typically desired if you plan to use the bull for a seedstock operation.

Please note that all of our black bulls are homozygous black and homozygous polled. The reds are homozygous polled as listed. One sire group, Shamwow, didn't have polled status testing.

The offering are virgin bulls except for three of them, Lot 28 (M65), Lot 5 (M38), and Lot 35 (M154) that we trialed on a few cows. They have been trich tested and are negative.

You are welcome to stop by the ranch anytime and take a look at the bulls. Our customers are our top priority and we are happy to answer any questions to help you find the next sire for your cowherd.

The Wicks Family

"CAUTION: GPS DOESN'T ALWAYS WORK."

DNA TESTING

All Wicks cattle have had tissue samples collected for 100K through the American Simmental Association with Neogen. The 100K tests for parentage and coat color as well as many genetic conditions and enhanced genomic EPDs. The bulls have correlating ASA registration numbers and EPDs. The EPDs were as of Jan. 29, 2026. All bulls are freeze branded with their tattoo number.

BREEDING GUARANTEE:

Bulls that sell for \$6,000 or more are guaranteed for breeding soundness for the first season through Sept. 1, 2026. If a problem occurs, contact Wicks Cattle immediately and a replacement will be furnished. All claims must be submitted by Sept. 1, 2026. The buyer assumes full liability of death or injury to his or her animal following the sale. We encourage all buyers to obtain insurance for their animal purchases. Insurance will be available the day of the sale.

BRAND INSPECTION:

A brand inspector will be available on sale day.

SEMEN TESTING:

All bulls in the sale have passed semen testing.

RETAINED SEMEN INTEREST:

Wicks Cattle is retaining 1/3 interest share in every bull selling in this sale. Full possession and full salvage value sell with the bull.

ANNOUNCEMENTS:

Announcements made sale day take precedence over any printed material.

ANY PERSON ATTENDING THE SALE DOES SO AT THEIR OWN RISK.

Neither the owners, nor any person connect with this sale assumes any liabilities legal or otherwise.

DELIVERY OF THE BULLS:

Delivery of long-aged bulls will begin the day after the sale. Free delivery up to 200 miles is provided by us. Any mileage beyond 200 miles, we will work with the buyers.

BRED HEIFERS:

We would like buyers of the heifers to take them as soon as possible. Buyer is responsible for transportation of the heifers. We will work with the buyer.

SALE ORDER:

Bulls will sell in catalog order.

ALL VIDEO SALE:

This is an all video sale. Videos of all lots will be played on two big screen TVs on sale day. You can view these videos prior to the sale at www.wickscattle.com or through DVAuction. There will not be any animals entering the sale ring. This makes sale day a much lighter load for us and the cattle. All lots will be displayed in pens for you to view on sale day. We strongly urge you to go through the cattle and make your critiques outside; this will help you during the sale. IF YOU PLAN TO BID BY PHONE THROUGH DVAUCTION OR ONLINE, REGISTER AT WWW.DVAUCTION.COM

EPD GLOSSARY:

EPDs are generated to show a sire's ability to transmit traits to its progeny such as

CE: Calving Ease

BW: Birth Weight

WW: Weaning Weight

YW: Yearling Weight

ADG: Average Daily Gain

MCE: Maternal Calving Ease shows which bull's daughters will calve unassisted as heifers, improving female maternal strength reducing stress, labor and risk)

Milk: Milk, pounds of weaning weight due to milk production

MWW: Maternal Weaning Weight is the sire's ability to transmit both milk production and growth potential to his daughters, which influences their calf's growth.

Stay: Staybaility the % of daughters remaining in the herd at 6 years of age.

Doc: Docility/Temperament

CW: Carcass Weight: pounds of carcass weight that improves her profitability and performance through data-driven decision.

Marb: Marbling

REA: Ribeye

API: All Purpose Index, a selection tool that calculates the expected dollar return for sires used, balancing maternal traits and carcass traits

TI: Terminal Index, a dollar value predictor of overall carcass merit of a sire's progeny

DOCILITY SCORES:

To improve our reporting to you, we also began with our own docility ranking as well the EPD for docility. We are also reporting our actual ratios for WW and YW as well as actual scrotal.

Docility scores:

1 = Very docile/quiet

2 = Average energy

3 = Nervous energy when sorted off

COAT COLOR AND POLLED STATUS:

Please note that all of our black bulls are homozygous black and homozygous polled. The majority of our reds are homozygous polled. Homozygous Black – you will get all black hided calves; Homozygous Polled - you will not have any horned calves.

BREED COMPOSITION LEGEND

Since the majority of the bulls in our offering are composite cattle, we want to provide clarity on the breed abbreviations used in their pedigrees:

SM = % Registered Simmental

CS* = % Commercial Simmental

AN = % Angus

AR = % Red Angus

*What does Commercial Simmental (CS) mean? Simmental percentages are differentiated between registered and commercial based on the registration status of animals within the pedigree, not on genetic merit. Animals shown with parentheses around their ASA numbers are classified as commercial, even though they may be fully eligible for registration. The CS designation reflects pedigree registration status and should be interpreted in the context of the bull's complete performance and genetic information as presented.

In this catalog, we listed the full percentage of Simmental that's in their pedigree. If you want to see the full breed composition, please look up the animal on the American Simmental Association website, simmental.org, or feel free to call us and we'd be happy to visit with you.

HOUGHTON RANCH BRED HEIFERS

We welcome the Houghton Ranch to this year's Wicks Cattle Bull Sale. Grady and Glen Houghton have brought in a very nice, hand-picked set of SimAngus bred heifers, and we are honored to have them here. The Houghton family has been great customers and friends for several years, and this offering reflects the quality they are known for.

These heifers are heavily influenced by Wicks Cattle genetics and were selected from a group of 100 bred heifers. They weigh between 1,050 and 1,100 pounds and are expected to mature at approximately 1,400 pounds. Bred to proven calving-ease bulls, they will begin calving around April 8, 2026, for a 30-day calving period. Be sure to take a close look at what they have to offer – the heifers will be on display on sale day.

The heifers will sell as a group.

Reflex has done us a great job in the short time we've owned him. He stamps his calves just like him. We can't say enough about the disposition and the mass they have. A true gentleman to be around. We plan on utilizing him for quite some time. He will be on display sale day.

We partnered with Beach Cattle and Grim Farms on this bull. Kruz has perfect feet, a true herd bull presence to him and extremely long spined and his from 1/3 is second to none for a purebred Simmental. The bulls are very consistent but I think his strong point will be his daughters. Look for more of the Kruz offspring in the future.

This is a bull we held back to clean up our open heifers. We've sold several of his sons in the past and the customers that have used them on heifers are very pleased. Rambo sired calves are trying to stand before the heifers do. No joking. Mary Jo says they look like little spiders with legs moving all over before bodies. This will be the last of the Rambos.

A really good War Cry son out of a Cow Maker daughter that has stood the test of time for us, she's been here a long time and keeps producing. The War Cry offspring have been proven here for several year. War Cry had calving ease with a lot of growth and his daughters have risen to the top in production. Top 3rd percentile for CW EPD.

This bull's dam goes back to a Big Valley daughter, 3222, that we flushed several times here. She was known for her great female lineage and bull progeny were all tremendous. Being sired by Reflex and out of this dam, you can expect huge results in both your steer pen and your replacement heifers.

We call him "Stubby" after his tail got stepped on. However, that isn't what sets him apart from the rest. He is the biggest framed, heaviest bull in the pen and is super gentle. He has very correct feet and legs. The dam is a Cowmaker daughter that has been a favorite of ours. If you want to see a set of heavy calves that are red, here he is!

Out of the sale offering, he is ranked #1 in WW, #2 in YW, #2 in Milk, #3 in TI. A really good Reflex son, who's dam was a daughter of CCR 3362 Payweight, a bull we purchased from Cow Camp Ranch in Kansas that did us a tremendous job. This bull ratioed very well. We trialed him on a few cows. Trich tested negative.

A bull with a lot of calving ease in his pedigree. He is ranked #9 in CE and #10 in BW out of this group of bulls. His dam, a 1779B mother, is a big deep-ribbed, moderate, calf raising kind. Not selling this guy as a true heifer bull but he has the stature and the numbers that suggest he may work on bigger framed heifers.

This bulls dam is a cow I have always like – her size, udder quality and disposition can't be beat. He will make you a fancy set of replacement heifer calves with calving ease and maternal traits bred in them.

He is ranked 7th in CE EPD in the sale offering, 6th in Maternal Calving Ease, 3rd in API. Keep every heifer calf out of this bull. He goes back to one of our old donor cows WIX U21 who left her mark here.

This guy is ranked #5 in this offering for CE and 2nd for Maternal Calving Ease. Very decent set of numbers with top 35% in nine categories. Moderate and smooth headed.

Kruz stamped this guy just like his other sons in terms of style, length, front end extension and excellent demeanor. Consistently nice set of EPDs across the board.

This is a very classy, whistle fronted son of Folsom 2066K. His dam, BZ402 was a great producer for us and was here a long time. A very quiet bull.

This bull's dam is out of a really nice Conneally Confidence cow. The Folsom 2066K's will be more moderate, very easy fleshing, and they have good dispositions.

M144's dam is one of my favorite War Cry daughters. He ranks in the top 30% in ten different categories. His traits lean more toward War Cry than they do Reflex.

Easy going, laid back Shamwow son from a good Cowmaker daughter. He's a balanced bull with a consistent set of EPDs.

A good War Cry son with a very good CE and BW to him. EPDs show he is in top 4% for CE, top 5% for MCE and 15% for BW. He is #5 in the offering for Maternal Calving Ease. Very smooth shouldered and could be a possible heifer bull prospect as we used War Cry on several first-calf heifers and got along really well.

*Lot 66 is out of the sale.

I really like this bull – he is very balanced and great looking. His mother is a really good United daughter. This bull has the makings to produce good calves. His DNA sample failed to qualify his to a sire and we didn't get a 2nd sample sent in on him. He sells commercial.

This bull's sire is Kruz, the dam is an own-daughter of Singletary that stood her test of time here raising 7 bulls for us. Due to her age we planned to sell her and she didn't have her enrolled but was bred and so this calf unfortunately sells commercial. But don't let that stop you as he's the same quality as all the others. Actual weaning weight was 610lbs.
